## Try All Questions

## Problem 1

A) Explain with detailed example the phases of the software life cycle

20 Points
(5 Points)
B) Given the following data (Table) for of $X$ and $Y$ variables, $N$ times write the pseudo code for the following flow chart (figure 1) and calculate its output? If there is missing steps in the flow chart list and correct it.

| $X$ | 4 | 5 | 6 | 8 | 1 | 22 | 56 | 23 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $Y$ | 18 | 15 | 61 | 12 | 2 | 33 | 4 | 55 | 66 |

Table 1

Figure 1

## Problem 2

Choose between A or B or C or D as a right answer.

| Question | A | B | C | D |
| :---: | :---: | :---: | :---: | :---: |
| 1-What is the only function all $\mathrm{C}++$ programs must contain? | start() | system() | main() | program() |
| 2-What punctuation is used to signal the beginning and end of code blocks? | \{ \} | -> and <- | BEGIN and END | ( and ) |
| 3-What punctuation ends most lines of C++ code? | - | ; | : | ${ }^{\prime}$ |
| 4-Which of the following is the boolean operator for logical-and? | \& | \&\& | 1 |  |
| 5-Evaluate !( $1 \& \&!(0 \\| 1)$ ). | True | False | Unevaluata ble | Syntax error |
| 6-Which of the following shows the correct syntax for an if statement? | if expression | if\{ expression | if( expression) | expression if |
| 7-What is the final value of $x$ when the code int $x ;$ for $(x=0 ; x<10 ; x++)$ \{\} is run? | 10 | 9 | 0 | 1 |
| 8-Which is not a loop structure? | for | do while | while | repeat until |
| 9-Consider the following section of $\mathrm{C}++$ program, in which i and n are int variables $n=7 ; i=4 ; i=n++$; <br> What are the values of $i$ and $n$ ? | $\mathrm{i}=7 \mathrm{n}=8$ | $\mathrm{i}=7 \mathrm{n}=7$ | $\mathrm{i}=8 \mathrm{n}=8$ | $\mathrm{i}=4 \mathrm{n}=7$ |
| 10 -Consider the following section of $\mathrm{C}++$ program, in which i and n are int variables $n=5 ; i=9 ; i=--n$; <br> What are the values of $i$ and $n$ ? | $\mathrm{i}=9 \mathrm{n}=5$ | $\mathrm{i}=4 \mathrm{n}=4$ | $\mathrm{i}=4 \mathrm{n}=5$ | $\mathrm{i}=5 \mathrm{n}=4$ |

## Problem 3

20 points
Given a vector of 100 students (names) and a two dimensions matrix of degrees of 5 courses for each student, the final of each course is 100 points, draw a flowchart and write a pseudo code to do the following:
Calculate the grade of each student for each course and print it out. Also calculate the total grade of every student, use the following grading schemes.
Degree $>=90$ points the grade will be $85 \%$ A
75 points<= Degree $<85$ points the grade will be B
65 points<= Degree $<75$ points the grade will be $\quad C$
50 points $<=$ Degree $<65$ points the grade will be D
Degree $<50$ points the grade will be F

Problem 4

## 30 points

A. Draw a flowchart and write pseudo code to print out the prime numbers from 1 to 30 given the following condition.
An integer $p>1$ is prime number if and only if the factorial $(p-1)!+1$ is divisible by $p$ finally write C++ code to implement that problem, write C++ code.
(15 Points)
B. Given two matrices $A(N, N)$ and $B(N, N)$ Draw flowchart, write pseudo code and write C++ code for the following :

1. Addition of the two matrices.
2. Subtraction of the two matrices.
3. Multiplication of a matrix $A$ by a scalar.
4. Multiplication of a matrix $A$ by a matrix $B$.
5. Transpose a matrix $A$ and matrix $B$.

## Problem 5

## 20 Points

A. For the sequential circuit shown in the following figure 2 , the current flowing through the inductor is zero. At $t=0$, the switch moved from position a to $b$, where it remained for 1 s . After the 1 s delay, the switch moved from position b to position c , where it remained indefinitely. Sketch the current flowing through the inductor versus time analytically and write a full $\mathrm{C}++$ code for your solution after drawing the flowchart.
(10 Points)

Figure 2
B. For the circuit shown in figure 3 find the current $i(t)$ and the voltage $\mathrm{Vc}(\mathrm{t})$ analytically and 1-Draw Flowchart,
(15 Points)
2-Write pseudo code
3-Full C++ code, for the solution.

Figure 3
