| Dept. of Power Mech. Eng. | Exam Type: Final |  |
| Course Title: Computer Application in MIPE | Time: 3 Hours |  |
| Course Code: MPE4125 | Full Mark: 90 |  |

Answer all the following questions. Write the flow chart for all program

## Question (1) ( 10 marks)

1-a)Write a computer program to get the area under the curve using trapezoidal rule $\mathrm{P}=0.22 \mathrm{~V}^{2}-0.4 \mathrm{v}^{4}+3$ From $\mathrm{v}=1$ to $\mathrm{v}=2$ with step equal 0.1 where

$$
w=\int_{1}^{2} p d v
$$

1-b) write a computer program to solve the equation $\mathrm{aX}^{2}+\mathrm{bX}+\mathrm{C}=0$ At $a=4, b=5, c=-4$

## Question (2) (20 marks)

2-a) write a computer program to calculate the root of the following nonlinear equation using Newton - Raphson method ( $\mathbf{X}-\mathbf{0} .2 \sin \mathbf{X}-\mathbf{0} .5 \mathbf{X}^{\mathbf{3}}=\mathbf{5}$ ) using the first gauss $X=0.1$ and the error equal 0.0001
[10mark]
2-b) write a computer program to calculate the root of the following nonlinear equation using Bi -section method ( $\left.\mathbf{X e}^{\mathrm{X}}-\mathbf{0 . 2} \tan \mathbf{X}-\mathbf{0 . 5} \mathbf{X}^{\mathbf{3}}=\mathbf{1 5}\right)$ using the first gauss $\mathrm{X}=0.1$ and $\mathrm{X}=1.5$ and the error equal 0.0001
[10mark]

## Question (3) ( 10 marks)

Write a computer program to determine a function fitting to the following data points by the least square method.

| i | $\mathrm{X}_{\mathrm{i}}$ | $\mathrm{Y}_{\mathrm{i}}$ |
| :--- | :--- | :---: |
| 1 | 1.0 | 2.0 |
| 2 | 1.5 | 3.2 |
| 3 | 2.0 | 4.1 |
| 4 | 2.5 | 4.9 |
| 5 | 3.0 | 5.9 |

Use the relation $\mathrm{Y}=\mathrm{A} \mathrm{e}^{\mathrm{bx}}$

## Question (4) ( 20 marks)

4-a) Write a computer program to get the solution of clamped at the natural frequencies of vibration of a uniform beam clamped at two ends satisfy;

$$
\tan (\beta \mathrm{L})=\mathbb{L} \tanh ((\beta \mathrm{L}), \quad \beta>0
$$

where $L$ is assumed to be 1 m . By Newton's method based on a difference approximation to evaluate the derivative, determine the lowest three values of $\beta>0$

Satisfying the equation above is used. Don't include $\beta=0$ as an answer. (hint: $\left.\tanh (\mathrm{x})=\frac{e^{x}-e^{-x}}{e^{x}+e^{-x}}\right)$

## [10mark]

4-b) Write a computer program to Calculate the root of $\boldsymbol{\operatorname { t a n }}(\mathbf{x})=\mathbf{3 . 5}$ in the interval $[1, \pi]$ by the bisection method with a tolerance of 0.005 . [10mark]

## Question (5) ( 15 marks)

Write a computer program to get root of the surface configuration of the NACA 0012 airfoil of Length 1 m and maximum thickness of 0.2 m is given by:

$$
Y(x)= \pm\left[0.2969 \sqrt{x}-0.126 x-0.3516 x^{2}+0.2843 x^{3}-0.1015 x^{4}\right]
$$

Where plus and minus signs refer to upper and lower surface respectively. Determine x where the thickness of airfoil is 0.1 m by using the bisection method . Set tolerance to 0.00001 .(There are two solutions).

## Question (6) ( 15 marks)

Write a computer program to get the density of the air using Equation of state:

$$
p=\rho \quad R \quad T
$$

Where $\rho, T$ and $p$ are density in $\left[\mathrm{kg} / \mathrm{m}^{3}\right]$, temperature in $[\mathrm{K}]$ and pressure in $[\mathrm{kPa}]$ respectively. The relation between $T$ and $P$ are shown in table 1
Please find the average temperature and pressure and also find the average density of the air

Where the value of the average temperature and pressure during empting process, according to the following relation:

$$
T_{a v}=\frac{1}{\left(t_{\max }-t_{\min }\right)} \int_{t_{\operatorname{mix}}}^{t_{\max }} T \cdot d t P_{a v}=\frac{1}{\left(t_{\max }-t_{\min }\right)} \int_{t_{\operatorname{mix}}}^{t_{\max }} P \cdot d t
$$

Table (1) relation between temperature and pressure at as a function of time

| Time ( $t$ ) <br> [min.] | Temp. ( $T$ ) [K] | Pressure ( $p$ ) [bar] |
| :---: | :---: | :---: |
| 0 | 300 | 4.9938 |
| 10 | 307.2432 | 4.796925 |
| 20 | 314.7764 | 4.58931 |
| 30 | 322.6333 | 4.370513 |
| 40 | 330.8541 | 4.140035 |
| 50 | 339.488 | 3.89731 |
| 60 | 348.5959 | 3.641702 |
| 70 | 358.2549 | 3.37246 |
| 80 | 368.565 | 3.088717 |
| 90 | 379.6595 | 2.789431 |
| 100 | 391.7231 | 2.473338 |
| 110 | 405.0231 | 2.138846 |
| 120 | 419.9734 | 1.783879 |
| 130 | 437.2755 | 1.405578 |
| 140 | 458.3037 | 0.9996519 |

Good Luck
Prof. M. G. Mousa
