Final May 2013, 3rd Vear at Production Engineering and Mechanical Design Department. Please solve the next problems. (Time: 3 hrs.)

1-[20 marks]-The thickness, in mm, of a particular metal part of an optical instrument was measured on 121 successive items as they came off a production line, as shown below.
a) Construct the most suitable frequency distribution for these data.
b) Use the histogram and cumulative frequency polygon to explain this production process.

| 3.40 | 3.21 | 3.26 | 3.37 | 3.40 | 3.35 | 3.40 | 3.48 | 3.30 | 3.38 | 3.27 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3.35 | 3.28 | 3.39 | 3.44 | 3.29 | 3.38 | 3.38 | 3.40 | 3.38 | 3.44 | 3.29 |
| 3.37 | 3.41 | 3.45 | 3.44 | 3.35 | 3.35 | 3.46 | 3.31 | 3.33 | 3.47 | 3.33 |
| 3.37 | 3.31 | 3.51 | 3.36 | 3.32 | 3.33 | 3.43 | 3.39 | 3.39 | 3.28 | 3.33 |

| 3.37 | 3.33 | 3.39 | 3.30 | 3.35 | 3.38 | 3.38 | 3.27 | 3.31 | 3.32 | 3.45 |
| 3.49 | 3.45 | 3.38 | 3.41 | 3.35 | 3.39 | 3.24 | 3.35 | 3.34 | 3.37 | 3.37 |

2-[15 marks]-A manufacturer uses three identical production lines to produce a product. The first line and the second line produce $30 \%$ and $45 \%$ of the output, respectively. The product needs to three types of machinery M1, M2, and M3. The probabilities that the machines produce defective components are $1 \%$ for M1, $2 \%$ for M2, and $3 \%$ for M3. A unit is selected randomly from a large batch, and this unit is supposed defective, find the probability that the first or second line produced it.

3-[20 marks]-Suppose that $X$ and $Y$ are two random variables having joint density function defined as

$$
f_{X Y}(x, y)=\left\{\begin{array}{ll}
\operatorname{cxy}(x+y), & 0 \leq x \leq 4,1 \leq y \leq 4 \\
0, & \text { otherwise }
\end{array},\right.
$$

where $c$ is a real constant.
(a) Find $F_{X Y}(x, y)$.
(b) Find $P([X+Y] \leq 4)$.

4-[15 marks]-A large truck is equipped with twelve tires double distributed on both sides. Suppose that the tires perform independently with reliability $p$ for each. Find the reliability of the tire system.

My best wishes...Prof. Dr. Hassan Soltan
